EMMANUEL COINS (\$EMAC) Is a token built in the cryptocurrency and Blockchain space. It's not collateralized and holds no real-world value the value is based purely on market demand. Once deployed onto the blockchain, the smart contracts are final. The team and/or any person associated with this project will not be legally held accountable for any subsequent losses, provide any support or services, or be held liable for users purchasing from noncompliant countries No part of this white paper constitutes and will not constitute any offer by EMMANUEL COINS (\$EMAC) , its distributors, and any sales team (as defined in this agreement), nor may the contents of the white paper be relied upon in any contractual and investment decision The basics. Nothing contained in this white paper can be taken as a representation, promise or guarantee of future performance.

OVERVIEW OF CRYPTOCURRENCY

Cryptocurrency is a rapidly growing digital currency that has taken the world by storm. As more people invest in digital currency, the importance of block chain technology increases. Blockchain is the underlying technology that allows for secure, distributed, and immutable digital transactions to take place. This technology can provide numerous benefits to users in the world of cryptocurrency, from improved security to faster transactions. In this blog post, we will explore the various benefits of blockchain technology in the world of cryptocurrency. Overall, blockchain technology provides an unprecedented level of transparency and security for cryptocurrency transactions. With its decentralized nature, no single party can manipulate or falsify records, ensuring that all transactions are secure and accurate. This high level of transparency also helps increase trust in the system, making it easier for users to feel comfortable investing in cryptocurrency.

WHY TO TRADE CRYPTOCURRENCY

1

Security

The security of blockchain technology is especially important in the world of cryptocurrency since users are dealing with digital assets that have real-world value. By using blockchain, users can be sure that their funds are stored securely and cannot be tampered with or stolen. Furthermore, users can rest assured knowing that their digital assets are being tracked accurately and that there is no risk of double spending or fraud.

2

Immutability

The blockchain technology that powers cryptocurrency is known for its immutability. This means that once a transaction is recorded on the blockchain, it can never be altered or reversed. This ensures that no one can tamper with or counterfeit transactions, ensuring maximum security and trust between users.

Immutability also helps to reduce the risk of fraud and double spending, as it ensures that funds cannot be spent multiple times. This is due to the fact that a single transaction on the blockchain is cryptographically secure and cannot be altered or reversed.

3

Decentralization

The decentralization of blockchain technology has had a profound impact on the world of cryptocurrency. Decentralization is one of the main benefits that blockchain technology offers, and it has enabled a number of important advancements in the realm of cryptocurrency.

The immutable ledger is a key component of cryptocurrency that makes it more secure than traditional banking systems. Since there is no centralized authority, records are stored on a distributed ledger and can never be changed or erased. This ensures that all transactions are permanent and cannot be manipulated by any external party. decentralization allows for faster transaction speeds than traditional banking systems. Transactions are processed in a matter of minutes instead of days or weeks, making them much more attractive for those looking to move funds quickly and securely. Overall, the decentralization of blockchain technology has been a major boon for the world of cryptocurrency. It has made it possible for users to take full advantage of the technology's unique.

Benefits while still maintaining a high level of security and reliability. As the technology continues to evolve, we can expect even more advancements and greater benefits in the near future.

EMMANUEL COINS OVERVIEW (\$EMAC)

EMMANUEL COINS (\$EMAC) is a meme coin built on the Binance Smart Chain network. Cryptocurrency is a medium of exchange that is decentralized encrypted and digital. EMMANUEL COINS (\$EMAC) is built to enhance easy trading and strengthen the work of God among Christian brethren. Unlike the U.S. Dollar or the Euro, there is no central authority that manages and maintains the value of a cryptocurrency. Instead, these tasks are broadly distributed among a cryptocurrency's users via the internet. EMMANUEL COINS (\$EMAC) is a meme token that can rival Shib and Doge. We believe that EMMANUEL COINS (\$EMAC) can rocket like Shib and want our community to benefit from this. Building a large and strong community is massive to us and at the forefront of what we want.

In order to allow more and easy donations of funds into the Non-Profit making organization, we brought about the idea of EMMANUEL COINS (\$EMAC)). A token that will allow donors to contribute using their part in helping the vulnerable kids and these donors would see their contribution used for the required purposes. With the introduction of this token, you can easily track how your donated funds are used and it will also make it easily accessible for anyone to make donations a unique deflationary. EMMANUEL COINS (\$EMAC) commit 5% of the fees to the charity wallet, this fees will be used to set up Non-Profit (CHARITY) making organization, is made regularly to these charity children. Due to its nature as a BSC token, EMMANUEL COINS (\$EMAC) offers faster transaction due to its ability to achieve three-second block times for confirming transactions with less fees and it has a low gas fee.

BENEFIT OF EMMANUEL COINS (\$EMAC)

1 Transparency

Blockchain technology provides an unprecedented level of transparency and security for cryptocurrency transactions with the blockchain provide security, this make EMMANUEL COINS (\$EMAC) tranparency coin on the binance smart chain network . With its decentralized nature, no single party can manipulate or falsify records, ensuring that all transactions are secure and accurate. This high level of transparency also helps increase trust in the system, making it easier for users to feel comfortable investing in cryptocurrency.

2 Long range vision

he long-term vision for blockchain technology is to revolutionize the way people and organizations transact and interact with each other. By providing a secure, immutable ledger system, blockchain technology can make it much easier to keep track of all the data related to any transaction. This makes it difficult to tamper with, meaning that the parties involved can trust that their agreement is safe and secure. Additionally, blockchain technology is decentralized, meaning that it does not rely on a single entity or organization. This further adds to the security of the network.

3

Community Development

The Blockchain technology that powers cryptocurrency has revolutionized the way we look at finance, and it's providing a great boost to the world of cryptocurrency. The distributed nature of the blockchain has given rise to an entirely new era of transparency and trust. What's more, the technology has enabled an unprecedented level of collaboration and communication among individuals in the cryptocurrency community. Cryptocurrency communities are becoming increasingly more vibrant as a result of the blockchain technology, and there are a number of benefits associated with this growth. For starters, users can now connect with other members of their community more easily and securely, which helps to foster trust and build relationships. Additionally, this connection allows users to access valuable resources and information that they may not have been aware of before.

PROJECT ROADMAP

Phase 1

- Creating and verification of Emmanuel Coins token contract address launch
- Launch of EMMANUEL COINS
- 500 holders
- 2000 wallet Transactions
- Website launch
- Contract Auditing by solidity finance
- White paper creation
- Road map creation

Phase 2

- CoinMarketCap & Coin gecko listing
- 5000 telegram members
- 2000 holders
- Creation of donation wallet
- Listing on a centralised exchange

Phase 3

- 20000 telegram members
- 12000 holders
- Lareation of donation wallet
- Listing on a centralized exchange
- Website redesign
- Meme development

Phase 4

- 70000 holders
- 100000 telegram members
- Increase marketing
- Partnership announcement
- Road map review
- Listing on a centralised exchange
- Market analysis for the future
- Contests/Giveaways for holders
- Charitable token
- EMAC will start an NFT collection soon

PROJECT ROADMAP

Phase 5

- Development of multi level marketing platform to reward Emmanuel coins trader
- Fintech application development
- Blockchain Application development
- Issuing cryptocurrencies and token. conducting ICO and IEO
- Creation of exchanges,exchangers and p2p platform
- Development of Defi Solutions
- Creation of electronic payment system
- Creation of mobile banking application
- Development of Trading bot and Terminal
